LARRY D. DONAGHUE  
PRIMARY EXAMINER

1. The following is an examiner's statement of reasons for allowance: the Examiner adopts the position of the BPAI in their decision of 06/16/04 as set forth below

The claimed invention recites that when a new domain name is received, new entries in a directory are created for all components that do not exist in the directory, and a real domain service record in a domain name server associated with the directory server is automatically updated. As argued by appellants, Masters relates to updating routing table information as new information is received. Masters teaches nothing about receiving information related to a new domain name. The fact that domain names per se were well known provides no basis to modify Masters to base the routing table on domain name information. As noted by appellants, the routing in Masters relates to source and destination points which are already known to the system. Masters simply determines the optimum-path in which to route the information. There is no suggestion in Masters or Kim of receiving new domain names and then creating entries in a directory and updating a domain service record in a domain name server as recited in claims 1, 10 and 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
